

July 29, 2005

Dear Commissioners,

My name is Gary Green and I represent MiCTA www.micta.org a non-profit national organization comprised of non-profit member institutions. MiCTA was recently awarded a 5 year 470 certification from the SLD filed on behalf of all of our school and library members nationwide and as part of the process we will be providing the SLD with all of the necessary documentation regarding our National Telecom/Internet RFP process.

Given the fact our 470 process is an extremely extensive best practices national undertaking it would be greatly appreciated if the FCC would accept our 470 process as fulfilling the requirements of 465 under the RHCD USF program for our Rural Health Care members thus eliminating thousands of individual 465 filings as is currently required under the RHCD USF rules.

If you believe that it would be advantageous for me to come to Washington to discuss this issue further I would be more than willing to do so as the 2005 RHCD 465 window is now open and we are hoping that we can greatly assist our eligible Rural Health Care members with the approval of this request.

We also have several State Government members and health care association members who want to support all of their eligible state health care constituents through this process.

I have met with Bill England and Mel Blackwell on several occasions regarding MiCTA and the RHCD process and believe that they are supportive of our request.

Thank you for your assistance in helping us help our rural health care members by considering this request.

Respectfully,

Gary L. Green
VP/CTO
